

NYMWHEL BERNARDO

Full-Stack Software Engineer (React, Angular, Java, Python)

+63 922 721 6804 | bnymwhel@gmail.com | myportfolio-nt2k.onrender.com | github.com/nbernardo1411 | Pasig, Philippines

PROFESSIONAL SUMMARY

Full-stack Software Engineer with 3+ years of experience across Angular, React, Java, Python, and Node.js. Handles a feature from requirements through deployment, including REST API integration, AWS infrastructure (RDS, Cognito, CloudWatch), and client demos. Currently the second most senior engineer on the team, working directly on production systems and client communication.

EXPERIENCE

Software Engineer II | Tsukiden Global Solutions Inc.

Aug 2025 – Present

- Own end-to-end delivery of client-facing features across React, Angular, Java, and Python REST API projects, translating requirements gathered in client demos directly into shipped functionality.
- Integrate REST API-connected features and align frontend behavior with backend responses, cutting down on UI/data mismatches surfaced in QA cycles.
- Work hands-on with AWS services (RDS, Cognito, CloudWatch) to support authentication, data persistence, and system monitoring for live production systems.
- Drive testing, debugging, and documentation for each release, and represent engineering directly in sprint reviews and client demonstrations.

Software Engineer | Tsukiden Global Solutions Inc.

Oct 2023 – Aug 2025

- Built full-stack features for enterprise client systems using Angular, React, Java, and Python REST APIs, covering CRUD operations, file upload and processing pipelines, and automated report generation.
- Resolved client-reported issues and delivered requested feature changes on sprint deadlines, coordinating directly with backend and QA teammates.

Trainee Software Engineer | Tsukiden Global Solutions Inc.

Jul 2023 – Oct 2023

- Ramped up on SDLC practices, Angular frontend development, and QA/debugging workflows, reaching full delivery ownership within the first three months.

SELECTED PROJECTS

Client / Professional

Partnership Management System (Angular, TypeScript, HTML, CSS)

- Owned UI/UX updates for this platform solo, building new screens, improving navigation and layout consistency, and handling testing before releases.

Project Management System (Angular, Python REST APIs)

- Extended an existing project-tracking platform, building out new Angular frontend features, integrating Python REST APIs, and resolving client-reported issues on live functionality.

Crypto Wallet System (React, Java REST APIs, AWS)

- Reviewed and manually verified registered users through AWS Cognito, and implemented new REST APIs, new screens, and ongoing bug fixes and testing.

Independent / Personal

Ledgerail (React, Node.js)

- Designed and deployed a full-stack, login-based web app for organizing scattered files into structured records. Handled the UI, backend integration, and deployment solo. *Live: ledgerail.onrender.com*

Space Impact Defender (React, Node.js, NeonDB)

- Built and published a 2D arcade game for Windows and Android on itch.io, handling gameplay systems, UI, and release builds solo. *Live: zukiaoki.itch.io/spaceimpactdefender*

Cryp-to-Dates (React)

- Built and deployed a crypto/token tracking dashboard with real-time data presentation. *Live: cryp-to-dates.netlify.app/dashboard*

EDUCATION

Bachelor of Science, Information Technology at Bulacan State University

Jan 2019 – Jan 2023

SKILLS

Frontend: Angular, React, TypeScript, JavaScript, HTML, CSS, REST API integration

Backend: Python, Java, Node.js, PHP, REST API development, CRUD operations

Databases: MySQL, PostgreSQL / NeonDB, PgAdmin

Cloud & Deployment: AWS (RDS, Cognito, CloudWatch), Netlify, Render

Tools & Practices: Git, GitHub, GitLab, Jira, Agile/Scrum, Kanban, sprint planning, automated testing, technical documentation
