

NYMWHEL BERNARDO

Full-Stack Software Engineer (React, Angular, Java, Python)

+63 922 721 6804 | bnymwhel@gmail.com | myportfolio-nt2k.onrender.com | github.com/nbernardo1411 | Pasig, Philippines

PROFESSIONAL SUMMARY

Full-stack engineer with 3+ years of experience in Angular, React, Java, Python, and Node.js. Delivers features end-to-end, from requirements through deployment, including REST API integration and AWS infrastructure (RDS, Cognito, CloudWatch). Experienced in production support, client demos, and direct client communication.

EXPERIENCE

Software Engineer II | Tsukiden Global Solutions Inc.

Aug 2025 – Present

- Deliver client-facing features end-to-end in React, Angular, Java, and Python, turning client demo requirements into shipped code.
- Integrate REST APIs and align frontend behavior with backend responses to reduce mismatches caught in QA.
- Support authentication, data storage, and monitoring for live production systems using AWS RDS, Cognito, and CloudWatch.
- Lead testing, debugging, and documentation for each release, and present engineering updates in sprint reviews and client demos.
- Use GitHub Copilot and Codex for code generation, debugging, and documentation, and to validate that report files match content requirements. Maintain Markdown instruction files to keep AI-assisted output consistent across the codebase.

Software Engineer | Tsukiden Global Solutions Inc.

Oct 2023 – Aug 2025

- Built full-stack features for enterprise clients in Angular, React, Java, and Python, including CRUD operations, file upload pipelines, and automated report generation.
- Fixed client-reported bugs and delivered feature changes on sprint deadlines, working directly with backend and QA teammates.

Trainee Software Engineer | Tsukiden Global Solutions Inc.

Jul 2023 – Oct 2023

- Learned SDLC practices, Angular development, and QA/debugging workflows, reaching full delivery ownership within 3 months.

SELECTED PROJECTS

Client / Professional

Partnership Management System (Angular, TypeScript, HTML, CSS)

- Owned UI/UX updates solo: built new screens, improved navigation, and tested releases before launch.

Project Management System (Angular, Python REST APIs)

- Extended a project-tracking platform with new Angular features, integrated Python REST APIs, and fixed client-reported issues.

Crypto Wallet System (React, Java REST APIs, AWS)

- Verified registered users through AWS Cognito and built new REST APIs, screens, and bug fixes.

Independent / Personal

Ledgerail (React, Node.js)

- Designed and deployed a full-stack login app solo that organizes scattered files into structured records. Live: ledgerail.onrender.com

Space Impact Defender (React, Node.js, NeonDB)

- Built and published a 2D arcade game for Windows and Android solo, handling gameplay, UI, and release builds. Live: zukiaoki.itch.io/spaceimpactdefender

Cryp-to-Dates (React)

- Built and deployed a crypto/token tracking dashboard with real-time data. Live: cryp-to-dates.netlify.app/dashboard

EDUCATION

Bachelor of Science, Information Technology — Bulacan State University

Jan 2019 – Jan 2023

SKILLS

Frontend: Angular, React, TypeScript, JavaScript, HTML, CSS, REST API integration

Backend: Python, Java, Node.js, PHP, REST API development, CRUD operations

Databases: MySQL, PostgreSQL / NeonDB, PgAdmin

Cloud & Deployment: AWS (RDS, Cognito, CloudWatch), Netlify, Render

Tools & Practices: Git, GitHub, GitLab, Jira, Agile/Scrum, Kanban, sprint planning, automated testing, technical documentation

AI-Assisted Development: GitHub Copilot, Codex — code generation, debugging support, documentation, and validating report file contents against requirements
